

Zainab Gilani

Software Engineer

✉ zainabgilani2226@gmail.com  github.com/Zee-Gg  [/in-zainab-gilani](https://in-zainab-gilani)  zainab-gilani.vercel.app

Profile

Software Engineer with production-grade experience across the full stack from schema design to deployed APIs to AI-integrated features. Builds systems with real-world reliability in mind: secure authentication, role-based access control, audit logging, and conflict-free real-time collaboration. Comfortable owning a feature end-to-end, from database architecture to a polished, production-ready frontend in Next.js/TypeScript.

Experience

AI Web Developer Intern | [NASTP](#)

Jul 2025 – Sep 2025

- Built full-stack **AI document intelligence** systems with NLP and computer vision integration
- Engineered a **PDF Q&A system** using RAG with semantic search and LLM reasoning
- Integrated **MMAction2** framework for video action recognition with efficient processing
- Demonstrated proficiency across modern **AI/ML pipelines**, from preprocessing to API deployment

Professional Projects

AI Quiz System | [Next.js](#) · [Node.js](#) · [MongoDB](#) · [Express.js](#) · [TypeScript](#)

April 2026 | [Click Here](#)

- **Solution:** Built a full-stack AI-powered quiz platform that uses LLM-based generation (Groq API) to dynamically create topic-specific assessments either from a user prompt or parsed content extracted from uploaded PDF/DOCX documents complete with automated grading, PDF report generation, and email delivery of results.
- **Impact:** Eliminated manual quiz authoring entirely by having AI generate contextually relevant questions on demand, turning any topic or document into a ready-to-take assessment in seconds instead of requiring a human to write and structure questions by hand.

Databridge | [Next.js](#) · [Node.js](#) · [PostgreSQL \(Neon\)](#) · [Express.js](#) · [TypeScript](#)

May 2026 | [Click Here](#)

- **Solution:** Designed a secure multi-organization data transfer platform with OTP authentication, RBAC, and a PostgreSQL schema featuring multi-tenant isolation and audit logging.
- **Impact:** Built an event-driven notification system with encrypted data transfers and guaranteed transaction integrity in real time.

Incline - Real-time Collaborative Markdown | [Next.js](#) · [Node.js](#) · [WebSockets](#) · [TypeScript](#) · [Tailwind CSS](#) · [Prisma](#) · [NeonDB](#)

July 2026 | [Click Here](#)

- **Solution:** Built a real-time collaborative markdown editor using Yjs CRDTs and Socket.io/WebSockets to enable conflict-free simultaneous editing, live cursor presence, version history with rollback, and role-based document sharing.
- **Impact:** Enabled multiple users to write and edit the same document simultaneously without losing or overwriting each other's work, giving teams a seamless, Google Docs-like collaboration experience for technical documentation.

Education

BSE Software Engineering

[Fatima Jinnah Women University](#)

2022-2026

Technical Skills

- **Backend:** Node.js, Express.js, REST APIs, Event-Driven Architecture
- **Frontend:** React, Next.js, TypeScript, Tailwind CSS
- **Databases:** PostgreSQL, MongoDB, Neon DB, Firebase
- **Tools:** Git, GitHub, Vercel, JWT, RBAC
